

Email and Flyer Human Subject Recruitment Script

The following script will be sent in email format to university organizations and posted in on university bulletins for the purposes of recruiting human subjects for the experiment.

****BEGIN EMAIL/FLYER SCRIPT****

Subject: Recruiting Subjects for Human-Robot Interaction Experiment

Body:

Hello!

We are researchers in the BEST Lab in the Mechanical Engineering department at UC, Berkeley conducting a study on human-robot interaction. We are searching for volunteer subjects for experiments involving a novel robotic interface. Participants should be English-speaking students at the university with limited exposure to robotics concepts. The experiment itself will last between 30 minutes and one hour and will require some physical interaction. Participation will involve interacting physically with a prototype robot.

If you are interested in participating, please sign up at the following link:

[INSERT GOOGLE FORM LINK]

For questions or concerns regarding the experiment, please contact Andrew Barkan at andrew_barkan@berkeley.edu. We appreciate your consideration!

Thank you very much,

Andrew Barkan

PhD Candidate, Mechanical Engineering
